

United States Navy K-Type Airships Pilot s Manual

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Periscope Film LLC, United States, 2015. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.In 1937, the U.S. Navy ordered a new class of Goodyear-built blimps with an envelope of over 400,000 cubic feet of helium. The K class carried a forty-foot long control car and were powered by two Pratt Whitney Wasp nine-cylinder radial air-cooled engines. They were intended to be used for anti-submarine warfare (ASW) duties. In addition to navigational equipment that allowed night flights, the blimps were equipped with the ASG-type radar, that had a detection range of 90mi (140km), sonobuoys, and magnetic anomaly detection (MAD) equipment. The K-ships also carried four Mk-47 depth bombs, two in a bomb bay and two externally, and were equipped with a .50in (12.7mm) Browning machine gun in the forward part of the control car. An aircrew of 10 normally operated the K-ships, consisting of a command pilot, two copilots, a navigator/pilot, airship rigger, an ordnanceman, two mechanics, and two radiomen. This Goodyear-issued official U.S. Navy Pilot s Manual is a reproduction of an original issued in 1942. It discusses the airship and its flight controls, the envelope pressure control system, power plant and electrical system, and more. Originally restricted, this manual was declassified long ago.
