Not illustrated. 1886 Excerpt: .bevelled straight out from the heel, thereby enabling the work to be better done, by getting it to fay close on to the bar. Therefore he thought it was well worthy the consideration of shipbuilders. As regarding economy, he had heard that it gave a saving in the labour of about 50 per cent.; that he had grave doubts about. But if it enabled them to make better work, although there might be no saving in the labour, that was sufficient to recommend it for general use. Mr James Williamson remarked that he had seen the machine at work twelve months ago, and he was extremely pleased with it. It was then bevelling large angles for a 2000 ton sailing ship, of 5 by 3 A by 8, and they were levelled quite easily with one heat, and were set to the shape at the same...
