North of the Kansas river and east of the Blue, portions of the valley were injured by cutting and by the accumulation of sand. The soil over a large part of the area was greatly benefited by the flood. South of the Kansas river just below Manhattan heavy washing was done, cutting up the fields badly and piling sand in many places, so that much damage was done. Just west of St. George, on the north side of the river, the Union Pacific track was washed out and the land between the track and the river principally covered by sand. Also, about one-half way between Manhattan and St. George, at the place where the river makes the large sharp bend south, the land on the south and concave side of the river was badly washed and much sand deposited. Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
