Outskirts Press, United States, 2015. Paperback. Book Condition: New. 234 x 156 mm. Language: English . Brand New Book ***** Print on Demand *****.Clear and mounting evidence is revealing that Earth is overheating. At the end of 2014, a report by the United Nations Working Group is advising that climate change is without any doubt becoming more damaging with each passing year. Climate change is undeniable and must be halted. This book presents the first plan for replacing fossil fuels with carbon-neutral energies. Nobody has predicted, yet, how fast temperatures will rise in future decades and how destructive major temperature increases can become. But it is already certain that putting a temperature limit of 2 degrees Celsius on global warming is impossible already. Financial interests fought a long and expensive media campaign and tried to put doubts into the minds of voters and preventing them from concluding that a continuation of fossil fuel consumption is against the self-interests of future generations. Thanks to a long-lasting, meticulously executed, and finally undefeatable collection of evidence by the IPCC of the United Nations, it is now absolutely certain that Planet Earth is under siege by defensive responses of Nature against the slow warming of the only place in the Universe, which can support intelligent, human life. Irrefutable laws of physics demand that the millennia old equilibrium of energy flows to and from Earth must be reestablished or temperatures on Earth will increase for an unknown number of decades and will move towards a still unknown final equilibrium temperature. At present, only two options exist for dealing with global warming. World leaders must decide between two, equally monumental options. They can decide to defy Nature and let energy industry interests continue with fouling of the Earth atmosphere. They will defend this suicidal decision by...
